	WO 1999-EP4675	W	19990706		
AB	In the title process, a particulate premix is molded to form a shell, the shell is filled with a melt or emulsion of a substance having m.p. >30.degree. and contg. dispersed or suspended active ingredients, and the molding is cooled and, optionally, post-treated. A mixt. of Na2CO3 32.0, Na tripolyphosphate (I) 52.0, Na perborate 10.0, Ac2NCH2CH2NAC2 2.5, benzotriazole 1.0, and ethoxylated fatty alcs. 2.5% and a mixt. of I				
91.4,	dye 0.2, enzyme 6.0, perfume 0.4, and silicone oil 2.0% were pressed in 75:25 ratio to form a shell which was filled with a melt suspension of paraffin (m.p. 57-60.degree.) 50, dichloroisocyanuric acid 35, and Tylose MH50 15% and cooled to give tablets for use in dishwashers.
